

Why write over the ghosts of words past?
Erase what you write.

Wall Applied Writing Surface

VS

Whiteboard - e3 Porcelain Enamel Steel

Why would you apply a porous writing surface that, as you use it, continually gets darker and darker with marker staining? And the only way to restore the surface is to reapply the film, basically investing in a total new product application.

The eisysVISUAL e3 Porcelain Enamel Steel Whiteboard is a truly optimum, non-porous writing surface that comes with a lifetime warranty against delamination and discoloration. Plus it's magnetic, scratch proof and impact resistant. Use our EXIMO Cleaning System* on eisysVISUAL Whiteboards and remove all marker stains—even permanent marker, because the marker ink sits on top of the enamel steel surface. Thus keeping your initial investment in pristine writing condition, and maintaining clear readability.

So the question becomes, are you ready to give up the ghosts?
